

Installation Instruction

1. Open the packing box and carefully remove the motorcycle and accessories.

2. Ensure you have all the necessary tools.

3. Install the front wheel by placing the spacer before tightening the fixed nut.

4. Remove the front brake caliper and install the front brake caliper.

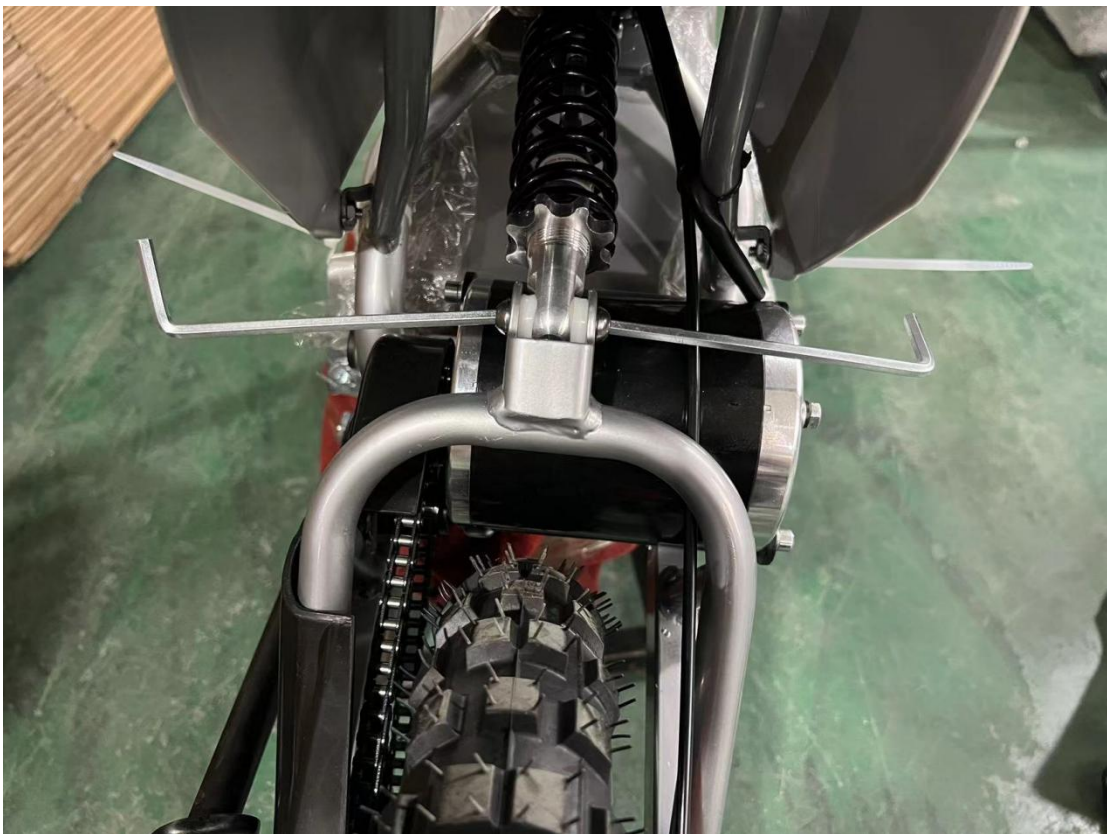

5. Install the handlebar.

6. Install rear shock.

7. Install the front fender.

8. Install the front number plate.

9. Install the handlebar pad.

10. Once all parts are securely installed, you can start enjoying your riding experience!
Please note: It is important to follow all safety precautions and guidelines while installing and using the motorcycle.
